

Investments Asset / Liability Risk Management

Comprehensive Approach to Balance Sheet Management

The Murray Bank

July 2023

Agenda

- Introductions
- Recap last conversation
- Overall balance sheet observations
- Review ALCO packet compare to Taylor Advisor process
- Deeper dive into Taylor Advisors Investment Management process
- Next steps

Recap of Our Last Conversation

- Increased Strategy in ALCO & Investments you desire to see more strategies developed and implemented in your ALCO & Investment meetings. Our entire balance sheet management & investment processes are built around developing proactive strategies with the bank to improve NIM and manage risk.
- <u>Liquidity Management</u> managing liquidity during the current economic and rate climate is paramount, especially for meeting the bank's robust loan demand. We'll leverage our expertise, strategies, and propriety tools to maximize efficiency in this key area.
- <u>Additional Perspective</u> by facilitating 400+ ALCOs per year with 130+ community banks, we have a unique perspective allowing us to bring you actionable strategies to improve NIM and manage risk.
- Education & Training there is a need for education & training for incoming executives. We'll fill this gap for the new executives through one-on-one coaching and frequent intra-quarter communication. This will maximize the bank's human capital.
- <u>Valuable Resources</u> we can become the equivalent of 3 or 4 part-time FTEs to help support your executive team such as:
 - ALM Manager
 - Assistant Treasurer
 - Investment Analyst
 - Balance Sheet Consultant

Starting with the end in mind

Our Typical Client:

- Is a community or regional bank
- Improves their net interest margin by 16 basis points after the first year of our partnership and/or
- Improves the yield on their investment portfolio by 23 basis points after the first year of our partnership
- Started with a high level of skepticism (appropriate for bankers who are and should be risk-averse)

Earning Asset Size	Net Interest Income Change in thousands of dollars (due to Yield change in basis points)									
(in \$000)	10	16	25							
400,000	400	640	1,000							
430,000	430	688	1,075							
460,000	460	736	1,150							
Investments	10	23	50							
105,000	105	242	525							
125,000	125	288	625							
145,000	145	334	725							

HUB | Taylor Advisors at a Glance

- Founded in 2002 & Acquired by HUB in 2022
- 130+ Balance Sheet Management (ALCO) Clients
 - Capital, Interest Rate Risk, Liquidity, Funding, Investments, etc.
 - \$91.2 billion consolidated total assets
- 140+ Investment Advisory/Consulting Clients
 - Investment Advisors: Discretionary, Non-Discretionary, and Co-Managerial
 - Taylor Advisors is not a broker/dealer, Bank does not give up control
 - \$18.3 billion assets under management
 - \$6.6 billion in municipal bonds (taxable & tax-free)
 - > \$11.8 billion in non-municipal bonds (agency, mbs, cmo, cmbs, sba, etc.)
- *\$50 Billion Investment Fund Consultant*
 - United States Department of Energy

Balance Sheet Mix Analysis

Challenges Managing a Bank's Balance Sheet

- Philosophy
 - Lack of Balance Sheet Strategies creative ideas to improve profitability and/or manage risk
 - Reactive Decision Making Process (Need to continue to be proactive)
- Earnings and NIM
 - Low Earning Asset Yields mix, selection, pricing
 - High Cost of Funds accelerating funding costs and/or deposit pricing frustrations
- Interest Rate Risk Regulatory Appeasement
 - Lacking confidence in the tools to measure, monitor, and control interest rate risk
 - Little to no documentation of various parts of the ALM process (i.e. assumptions)
 - Regulators are critical of the ALCO process or IRR measurement tool
- Capital
 - Understanding capital's impact on Interest Rate Risk, liquidity, and returns
 - Capital management and monitoring process needs enhancement, including stress testing and dynamic forecasting
 - Lack of comprehensive policy/plan including capital contingency planning
- Liquidity Profit Improvement
 - Difficulty with liquidity assessment, management, and monitoring risks, tools, policy, and strategies.
 - Contingent liquidity planning MUST include scenario stress-testing with triggers (a.k.a., Dynamic Cash Flow Testing).
- Education/Training
 - Needing a succession plan for ALCO/balance sheet management
 - Executives may lack either time, technology, or expertise in balance sheet management
 - Little to no board oversight/education relating to asset liability management (training to executive management/board)
 - No independent analysis of the balance sheet, liquidity or investment portfolio

Balance Sheet Strategies

Taylor Advisors Services

- Operational Kick-Off meeting
- Customized ALCO Presentation/Packet
- Co-Facilitate Quarterly ALCO (Education & NIM Management)
- ALM Policy and IRR Assumptions Review/Recommendations
- Detailed review of various Interest Rate Reports
- Deposit Beta and Decay assumptions memo/analysis and/or stress testing
- Liquidity Assessment/Management/Policy Review
- Liquidity Analysis Worksheet & Contingency Funding Scenarios
- Deposit Benchmarking/Funding Analysis
- Perform Quarterly Capital Stress Tests (Growth and Credit)
- Review/Develop Capital Policy (includes Capital Contingencies)
- Balance Sheet Monitor Report (trends/observations/peer analysis)
- Investment Sector Recommendations with Product Examples
- Quarterly Investment Analytics (Cash Flow, Stress Testing, etc.)
- Balance Sheet Strategies for Profit Improvement/Risk Management
- Executive Summary Notes documenting Balance Sheet Strategies
- Weekly Commercial Loan Pricing Matrix Distribution
- Assist in Resolving Examiner Criticisms Associated w/ ALM Issues

Planning-Based Balance Sheet Management Process

Kickoff/Operational Meeting (Road Map)

- Review engagement objectives and set deadlines i.e., policy reviews
- Balance Sheet Phases: Liquidity, Capital, and IRR Management
 - Prioritization process Interest Rate Risk vs. Liquidity
- Policy limit appropriateness given new/tougher regulatory & economic environment

Taylor Advisors Co-Facilitates the Formal ALCO, Management ALCO, Executive ALCO Working Group

- External ALM Analyst (Ideas, Opinions, and Analysis)
- Action / Pending items for Taylor Advisors and/or your institution

Balance Sheet Analysis and Strategy Discussion

- Balance Sheet Monitor (Macro) Trends & Observations
- ALCO Reports (Micro) GAP, NIM Simulation, and EVE
- Other Internal Reports (CD maturities, rate sheets, wholesale funding, etc.)

Frequent Communication

- Intra-quarter Communication (phone, e-mail, group conference calls, meetings)
 - Policy updates, NIM protection strategies, deposit products, whole-sale funding, etc.

Balance Sheet Management – Investments (P4)

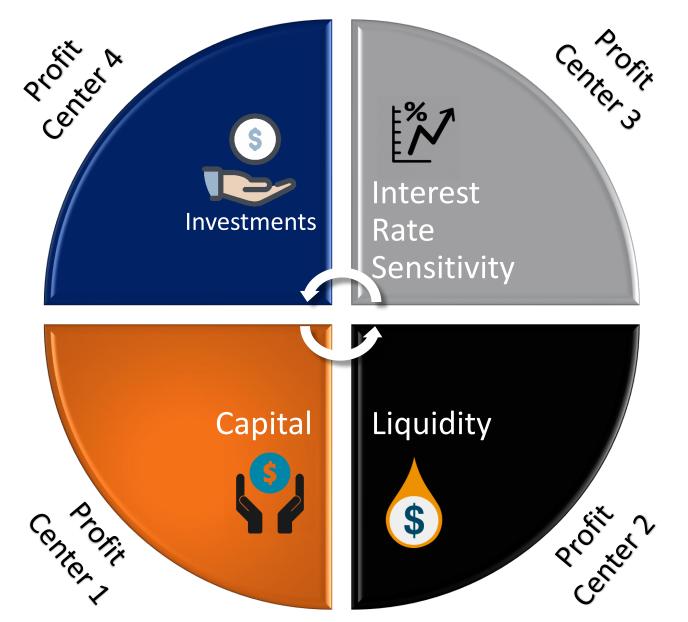

Taylor Advisors Summary Notes

- Summary Notes are sent to clients after each quarterly meeting, summarizing <u>discussions</u>, <u>action items</u>, and <u>strategies</u> for the following areas:
 - Balance Sheet Review
 - Net Interest Margin and Peer Analysis
 - Capital Adequacy
 - Interest Rate Risk
 - Liquidity Management
 - Deposit Pricing and Funding Mix
 - Investment Portfolio

Reimagining ALCO - Impact

Strategy Assessment

- Loans
 - Pricing
 - Growth
 - Risk Compensation
- Deposits
 - Pricing
 - Growth
 - Retention
- Tax Minimization
- Hedging
- Capital
- Liquidity
- IRR
- Investment

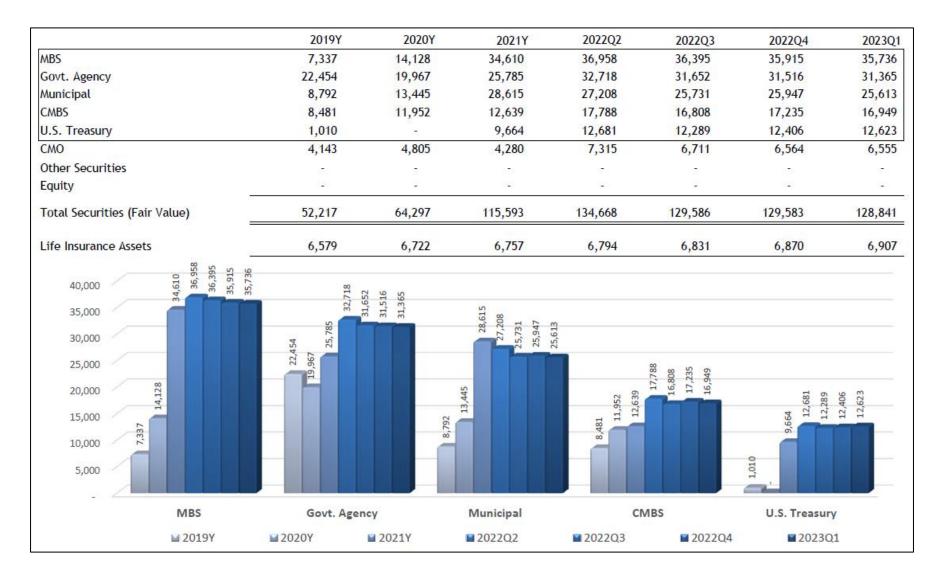

Taylor Advisors Services

- Investment Policy Review and Policy Compliance Report Development
- Customized Quarterly Investment Analytical Review/Report
- Investment Strategy Recommendations & Product Review
- Security Execution of Client-Approved Strategies (Cusip-level)
 - Treasuries, Agencies, MBS, CMO, SBA, CMBS
- Complete Purchase Analysis/Documentation for All Securities
- Pre-screen/Document/Update List of Approved Brokers
- Frequent Intra-quarter Communication: Monitor Cash Levels & Execute Strategies
- Education and Execution of Expanded Permissible Investment Sector Alternatives

Your Current Investment Portfolio

Challenges Managing a Bank's Investment Portfolio

- Low or Average Portfolio Yield
 - Probably means the investment strategy needs adjustments
 - Suboptimal investment mix & lack of relative value analysis
 - Sector concentrations in poor risk/reward securities & underperforming peers
 - Lack of ongoing investment portfolio performance measurement

Philosophy

- Ignoring investment management from a whole bank (asset/liability) perspective
- Too much reliance on the broker/dealer community for advice
- Right-sizing the investment portfolio for your balance sheet (size, mix, length, etc.)
- Product selection, sector concentration, lack of diversification

Strategies

- No independent investment discussions or 3rd party analysis and interpretation
- Reactive decision making in response to broker solicitations
- Not changing the portfolio as the balance sheet changes in mix, IRR, and liquidity constraints (always buying the same bonds)
- Not fully optimizing investment focused tax minimization strategies

Operationally

- Distraction from your primary responsibility of running the bank
- Difficulty with investment portfolio monitoring (risks, tools, and policy) effective risk management
- Dated Investment Policy

Expertise

- Executives may lack either time, technology, or expertise in investment management
- Implementing a succession plan for investment management. Utilizing a 3rd party in advance to assist in education and strategy development can help when transferring duties.
- Little to no board oversight/education relating to investments (Annual investment training to management/board)

Investment Advisory Best Practices

Strategy

- Independent expert advice on portfolio strategies with regular review
- Whole-Bank perspective approach to portfolio positioning

Investment Mix

- Diversification among investment sectors, risk/reward & relative value analysis
- Expanded range of bank-permissible investment products

Security Selection

- Market knowledge and expertise helps optimal security selection
- Monitor policy compliance with security purchases

Trade Execution

- Poor trade execution can impact investment returns
- Fiduciary vs. Broker

Assessing Your Investment Process and Portfolio Performance: Broker vs. Advisor

Assessing Your Investment Process and Portfolio Performance: Broker vs. Advisor Approach

10/28/2020 | 8 MIN READ

Investment portfolios and overnight cash positions have grown significantly at many financial institutions due to a recent surge in deposits and slower portfolio loan demand. With record low interest rates, carrying excess cash on the balance sheet has been costly. These factors are forcing executive teams to re-focus on the investment portfolio to help relieve net interest margin pressure from declining earning asset yields.

In general, financial institutions have two options for managing the investment portfolio. We will refer to these as the Broker and the Advisor approach.

The Broker Approach

An institution's financial executive (CFO, President, Portfolio Manager, etc.) has the option of working directly with a variety of brokers/brokerage firms to make investments for the portfolio. Usually, brokers will present different products for consideration often via...

Read Full Article

If you are considering a change from a broker approach to an advisor approach or switching advisors, below we discuss seven benefits and/or best practices of working with an investment advisor to improve portfolio and balance sheet performance:

1. Investment Management from a Whole Balance Sheet Perspective

- 2. Accountability & Transparency
- 3. Strategy and Relative Value Analysis
- 4. Exclusive Product Access
- 5. Staying in Control
- 6. Reducing Transaction Costs and Improving Execution
- 7. Redirected Productivity

Separation of Broker Dealer Lists

<u>Municipal Market</u> <u>Underwriters/Dealers</u>

Sr. Deal Manager 3

Sr. Deal Manager 4

Brokers for Taxable Investment RAYMOND

JAMES

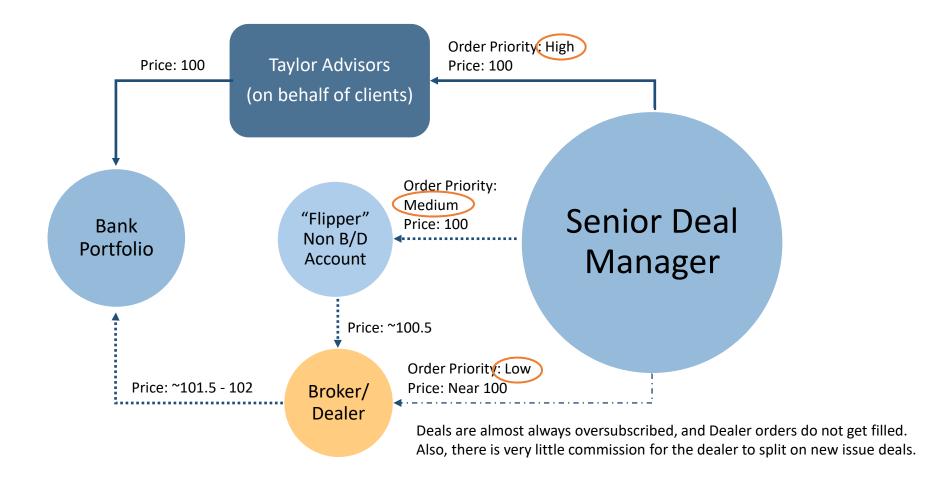

- Sr. Deal Manager 30
- Taylor Advisors manages the broker list at the subsidiary level. A separate and expansive list of broker/dealers will improve pricing and availability while saving executives time and resources.
- Bank portfolio managers typically have a broker/dealer list that generally traffics in US Government guaranteed taxable securities.

Comparison of Investment Advisor vs. Broker / Dealer

Professor Emeritus of Economics and Business at Lafayette College Dean of the West Virginia Banking School and the Virginia School of Banking Executive Director of the Sheshunoff Affiliation Program The ANSWER is a very well-kept secret. Institutional investors do not know how much they are being charged to buy and sell bonds.

Industry Analysis: Hidden Mark-Ups

- "We estimate that investors were charged \$10.58 Billion in municipal bond markups between 2005 and 2013 in our sample - \$6.38 Billion in trades on which excessive markups appear to have been charged"
 - The Securities Litigation & Consulting Group
- "The clients never saw the actual transaction costs and assumed, inappropriately, that they were getting that service fee for free."

Conclusion

 "Our Analysis finds that community financial institutions are financially impacted by significant hidden mark-ups in their investment portfolios; mark-ups that reduce ROI, ROA and financial institution capital"

Poor Trade Execution: Lower Liquidity

Summary

ROCK:[\$1.31, \$1.31, \$1.33, \$1.26] PRK topped our estimate, but fell short of Street expectations as it posted earnings of \$1.31/sh. As compared to our model, a lower provision helped drive the majority of the beat as weaker fee income was nearly offset by better spread income. Factoring in a lower run rate on noninterest income, we lower our estimates for 2017, 2018 and 2019, but maintain our \$104 target. We reiterate our Market Perform rating.

Variance to our model – 0.05/sh positive variance reflects a lower provision (+0.06/sh) and better fee income (+0.03/sh), which were somewhat offset by lower fee income (-0.04/sh)

Recap. Better than expected earnings reflect a lower provision and better spread income, while fee income was lower than expected. Margin expanded to 3.49% from last quarter's core of 3.42%, exceeding our 3.43% forecast as average earning assets were both slightly higher and a better mix as PRK added some higher yield municipal securities to the books. Credit trends remained strong, leading to lower NPAs and NCOs, and thus, a lower provision for the quarter. *Please see more quarterly details on Page 2*.

Bringing it full circle

Our Typical Client:

- Is a community or regional bank
- Improves their net interest margin by 16 basis points after the first year of our partnership and/or
- Improves the yield on their investment portfolio by 23 basis points after the first year of our partnership
- Started with a high level of skepticism (appropriate for bankers who are and should be risk-averse)

BALANCE SHEET MANAGEMENT

THE BANK:

Where you're always First

Taylor Advisors began working with First Savings Bank (Clarksville, IN) in the 1st quarter of 2004.

THE CHALLENGE:

First Savings Bank needed assistance in the areas of balance sheet management and investment advisory.

THE SOLUTION:

Since the start of the engagement, Taylor Advisors has been providing advice in the areas of capital, liquidity, funding, interest rate risk, investments, deposit and loan pricing. First Savings Bank and its subsidiaries have also been utilizing Taylor Advisors for investment advisory services. Goals were established regarding the credit quality of investments, duration of the portfolio, maximum allocation for various sectors of the fixed income market, and procedures for security execution.

AT A GLANCE:

- \$1.76 Billion Assets as of 2021
- 3.82% Net Interest Margin (FTE) as of 2021
- 3.81% Investment yield (FTE) as of 2021
- 98th Percentile Investment yield rank among peers as of 2021
- 729% Stock price increase (unadjusted) from IPO on October 6, 2008 – March 10th, 2022
